User : Hey

Pybot : I am glad! You are talking to me

User : What is Python?

Pybot : Python is a high-level, interpreted, interactive and object-oriented scripting programming language. Python is designed to be highly readable. It uses English keywords frequently where as other languages use punctuation, and it has fewer syntactical constructions than other languages.

User : What is module?

Pybot : A file containing a set of functions you want to include in your application.

User : What is a tuple?

Pybot : tuple packing is a way to pack a set of values into a tuple.

User : What are dictionaries?

Pybot : dictionaries are indexed by keys.

User : what is split funtion in python

Pybot : split function in python helps in breaking a string into shorter strings
